

Capital Project Update

Date: June 8, 2018
From: Frank Ferraro
Subject: June 8, 2018 - Update

Currently the old transportation garage adjacent to the High School parking lot is being abated and then will be demolished. The abatement and demolition work that started on June 7, 2018, is expected to last through the end of next week.

The week of June 11, 2018, a stone construction road will be built in front to the school to accommodate construction vehicles. Additionally, a construction trailer will also be located in front of the school.

In the coming week, work will begin in the high school boiler room. The majority of this work will be done after the school day is over so there will be a minimal impact on students and staff.

Once finalized, we will update you on the summer construction calendar and availability of spaces in and outside the building.
